

Notice on Dispatching Project Team to the United States for Urban Transport Policy Research

XX Institute International Cooperation [2024] No. 15

Transport Policy Research Center:

To further advance the "Comparative Study on China-US Urban Transport Policy" project (Project No.: TRP-2024-008), the Institute Affairs Meeting has decided to dispatch a project team to the United States to conduct a six-day field research and visit. The relevant matters are hereby notified as follows:

I. Research Purpose

This research aims to gain in-depth understanding of the advanced experience and practical approaches of major US cities in public transport policy formulation, urban transport planning, green transport development, and sustainable city construction. Through field visits, discussion exchanges, and data collection, first-hand materials and references will be provided for the Institute's related research. The research results will directly serve the writing of the project final report and lay the foundation for the Institute's subsequent research in related fields.

II. Research Personnel

This research dispatches 2 persons, specifically as follows:

1. Zhang Wei, Deputy Director of Transport Policy Research Center, Project Leader of this research. Responsible for overall coordination of research activities, external liaison, results compilation, and report writing. Position level: Professor.

2. Li Na, Assistant Researcher of Transport Policy Research Center, Core Researcher of the project. Responsible for research data collection, meeting minutes, material organization, and logistics coordination. Position level: Lecturer.

III. Research Period

March 8, 2024 (Friday) to March 13, 2024 (Wednesday), totaling 6 days (including round-trip travel time).

IV. Research Cities and Main Tasks

This research covers three major cities on the US East Coast. The specific arrangements for each city are as follows:

1. New York (March 8–March 9, 2 days)

Main tasks: Visit transport planning research institutions, focusing on understanding New York metropolitan area transport governance experience, public transport operation & management models, and comprehensive traffic congestion treatment measures. Proposed institutions include research departments under the Metropolitan Transportation Authority and related transport planning consulting institutions.

2. Washington D.C. (March 10–March 11, 2 days)

Main tasks: Visit transport policy research institutions and urban planning research centers to conduct in-depth exchanges and discussions on federal-level transport policy formulation processes, urban public transport planning, green transport policy, and sustainable urban development. As the seat of the US federal government, Washington D.C. is the core city for understanding federal transport policy formulation and implementation, and the research in this city is a key component. March 10 is arranged with intensive research activities, with one institution visit in the morning and one in the afternoon; March 11 has a department visit in the morning, an academic seminar in the afternoon, and departure for Boston in the evening.

3. Boston (March 12–March 13, 2 days)

Main tasks: Visit renowned academic institutions to conduct academic exchanges on cutting-edge topics such as public transport technology innovation, smart transport system construction, and low-carbon travel. Boston has rich academic resources, and exchanges are planned with the MIT Transport Research Center and related research groups at Harvard Kennedy School.

V. Work Requirements

1. During the research period, project team members shall strictly abide by the Institute's foreign affairs management regulations and business trip management systems, and pay attention to personal and property safety;

2. Research notes and collected materials should be organized promptly after each day's research to ensure completeness and accuracy;

3. All transport, accommodation, meal receipts, and reimbursement vouchers shall be properly kept as the basis for subsequent reimbursement;

4. Within two weeks after the conclusion of the research, the project leader must submit the "US Urban Transport Policy Research Report";

5. Research-related expenses shall be executed in accordance with the provisions of the "Employee Business Travel Reimbursement Management Measures" and charged to the project funds;

6. During the research period, local transport shall mainly use taxis, ride-hailing, and other public transport means, and reasonable transport expenses incurred shall be reimbursed with vouchers.

VI. Budget

This research budget is drawn from the "Comparative Study on China-US Urban Transport Policy" project (Project No.: TRP-2024-008) funds. All expense standards shall be executed in accordance with the relevant provisions for overseas business trips in the "Employee Business Travel Reimbursement Management Measures".

Please make all necessary preparations before departure upon receipt of this notice, including itinerary confirmation, material preparation, and foreign affairs approval, to ensure the smooth completion of the research tasks.

Hereby notified.
