

PURCHASE REQUEST FOR OFFICE SUPPLIES

Department: Administration & Support

Applicant: Amina Mansour (Administrative Assistant)

Request Date: August 7, 2023

Execution Location: Giza, Egypt

Due to the high consumption of daily office supplies at the Giza office during the summer, the current inventory of low-value consumables (including stationery, cleaning supplies, and drinking water) has dropped below the safety level. To ensure the smooth operation of scientific research and fieldwork in mid-August 2023, a centralized replenishment is required this week.

The scope of this procurement includes:

1. Office Stationery: Consumables for daily recording and filing.
2. Life Support: Replenishment of drinking water for the office area.
3. Environmental Hygiene: Low-value consumables required for daily maintenance of the office.

The planned procurement date is August 9, 2023, in Giza. All procurement activities will strictly follow the financial reimbursement compliance requirements of the office to ensure valid receipts and authentic transactions.
