

Notice on Snack Bar Operations and Procurement for New York Office

In accordance with the 2009 Employee Care Plan, the Administrative Office hereby issues the following notice regarding snack bar and snack procurement for the New York research office during October to support high-intensity projects:

Administrative staff in each lab and office are required to regularly check the inventory of tea break areas. Given the heavy research workload in October, the Administrative Supervisor is authorized to arrange for local procurement of daily supplies based on the actual number of staff present to ensure the continuous operation of the research environment.

1. Procurement personnel must strictly follow the work cycle of October 2009 for material preparation, and all procurement must be completed within New York City.
2. Procurement details must be recorded in the Administrative Inventory Log for filing, ensuring "every item is recorded upon entry."
3. Reimbursement applications must be accompanied by corresponding inventory logs; fictional consumption is strictly prohibited.

Department heads are requested to strictly oversee the flow of materials to ensure the rational distribution and efficient use of administrative resources.
